# Gbolade "Kay" Kayode

gboladekayode@gmail.com

## SUMMARY OF COMPETENCIES

- Four years of experience in managing scientific projects and applying statistical data analysis techniques, quantum chemical methods, and high-performance computing to solve research problems and accelerate the discovery of novel materials to combat global challenges in clean energy.
- A tangible record of successful collaborations and completion of independent projects through publications in journals and conference presentations
- Adept at the use of analytical tools (Python, Excel, SQL, Tableau, Git) and state of the art machine learning techniques.

## EDUCATION

**Doctor of Philosophy (Ph.D.), Chemical Engineering** **Expected graduation May 2023**
*GPA: 3.98/4.0*
Tulane University, New Orleans, LA

**Master of Science, Chemical Engineering** **May 2022**
*GPA: 3.98/4.0*
Tulane University, New Orleans, LA

**Bachelor of Science, Chemical Engineering** **June 2016**
*First class Honors*
Covenant University, Nigeria

## EXPERIENCE

**Graduate Research Assistant** **2018 – Present**
**Department of Chemical Engineering, Tulane University,** *New Orleans, LA*

- Successfully designed, implemented, and reported outcomes of five projects over a four-year period, ensuring efficient use of resources and minimizing rework.
- Developed a predictive, interpretable model to understand the factors that control oxophilicity and carbophilicity in pure metal surfaces.
- Developed a general, reusable model to screen alloy surfaces for various catalytic reactions.
- Created high standard data visualization outputs using software such as Python, Tableau, and Microsoft power-point.
- Gave theoretical guidance to experimentalists by performing quantum-chemical calculations and structural analysis of catalytic systems.

**Scientific Software Developer & Materials Data Scientist (PhD intern)** **Summer 2022**
**Enthought Incorporation,** *Austin, TX*

- Developed machine learning solutions to tackle polymer formulation scale-up issues for a client R&D company, saving them about $90,000 per formulation scale-up.
- Created a machine learning framework to help lab researchers optimize polymer film thickness and also to understand some of the factors that determines this thickness.

**Analytics Consultant** **2018**
**Krosk Partners Limited,** *Lagos, Nigeria*

- Transformed financial data into insights that informed, identified trends, answered questions and provided recommendations based on project specific goals.
- Researched, analyzed market trends, and collaborated with traders to develop optimal market strategies.
- Contributed to team building, client retention, and business goodwill through prompt delivery of project assigned responsibilities

**Graduate Assistant** **2016 – 2017**
**University of Lagos (Unilag),** *Lagos, Nigeria*

- Performed literature searches and contributed to various research projects.
- Mentored undergraduates through the Unilag Counseling outreach.
- Contributed and organized several student developments programs such as Academic Fairs, Career conferences e.t.c.

**Production Engineer (Intern)** **2015**
**Addax Petroleum,** *Lagos, Nigeria*

- Contributed to the development of predictive models for asset production based on reservoir indicators.
- Gained skills training in Asset integrity and well work executions.
- Performed Asset integrity audits on Pressure safety valves (PSV's) for all the company's producing assets.
- Used SQL, Excel, to monitor daily asset productions and equipment performance.

## SKILLS

- Excellent analytical, teamwork, and communication skills.
- Proficient with MS Office (Word, Access, Excel, PowerPoint), Tableau, SQL, Python, Git, MATLAB.
- Expertise in machine learning, deep learning, data science and data visualization.
- Adept at quantum-chemical simulations, high-performance computing and computational chemistry.

## EXTRA-CURRICULAR ACTIVITIES

- Partnered with the United States Army eCYBERMISSION STEM education initiative as a volunteer judge for science competitions from 2019 to present
- Mentored undergraduates in computational materials research at the Tulane SMART REU program.
- Teamed with undergraduate students at Tulane University as volunteer instructors to support the STEM NOLA education initiative for K-12 students in New Orleans communities.
- Vice president at Tulane's chapter of the National Society of Black Engineers.
- Volunteer at Louisiana FIRST® LEGO® League (FLL) Robotics State Championship.

## AWARDS

- 2022 Graduate scholarship, Society for Mining, Metallurgy & Exploration.
- 2022 NSBE Fulfilling Legacy Award, National Society of Black Engineers
- 2022 NSBE BCA/Affiliate/ Fellows Scholarship, National Society of Black Engineers
- 2021 AADE Scholarship Award, American Association of Drilling engineers
- 2021 Anchor Achievement Scholarship Award, Pilot International Inc
- 2021 National Association of Surface Finishing Graduate Award, NASF Foundation
- 2021 NSBE BCA/Affiliate/ Fellows Scholarship, National Society of Black Engineers
- 2020 AKA EAF Graduate Awards, Alpha Kappa Alpha Educational Advancement Foundation
- 2020 AADE Scholarship Award, American Association of Drilling engineers
- 2020 NSBE Apex Scholar, National Society of Black Engineers
- 2020 Anchor Achievement Scholarship Award, Pilot International Inc
- ISA PMCD Scholarship Award, International Society of automation
- Graduate Achiever Scholarship Award, Honor Society
- National Association of Surface Finishing Graduate Award, NASF Foundation
- Rosagene Huggins Memorial Award, ESA Foundation
- Serc Endowment Award, ESA Foundation
- First Class Honors, Covenant University
- Award of Excellence, Covenant University

## PROJECTS

- Design of A Plant for Production of 48,000 Kg/Day of Methyl Ethyl Ketone by Vapour Phase Catalytic Dehydrogenation of 2-Butanol. (Team lead for Undergraduate design project)

## CONFERENCES

- 2021 NOBCCHE Conference. (Oral Presentation)
- 2021 ACS Spring Conference. (Oral Presentation)
- 2020 Annual AICHE conference. (Oral Presentation)
